

岡崎乾二部

(But in truth, the first creatures were driven from the sea. They fled. That's why so many of us get seasick. A mudkipper crawled onto the beach, raising its head. "Look," he said, beholding the vast expanse. "Thousands of miles of flat nothing."  
Fish swim through water endlessly; no end to the water they swim. Birds fly through sky ceaselessly; no end to the sky they fly.

There is no reason. We skipped the light fandango, though in truth we were at sea. She said, "I'm home" leaving for the coast.

Darkness covered the empty earth; The Spirit hovered over waters. Let there be waters teeming with life, birds multiplying on earth. All that moves in sea and sky, each according to its kind, merely drifted through the world. Evening fell, then dawn broke.)

## Kenjiro Okazaki Exhibition at Museum of Contemporary Art Tokyo

APR 29-JUL 21 2025 · 10:00-18:00

### Forms in Flux: Explore The Boundless Art of Kenjiro Okazaki

The Tokyo Museum of Contemporary Art is set to host "Kenjiro Okazaki: The Art of Form," a major retrospective running from April 29 to July 21, 2025.

Kenjiro Okazaki, renowned for his versatile creativity in sculpture, architecture, environmental planning, children's books, and robotics, has established himself as an influential critic of contemporary Japanese culture. This landmark exhibition, his first large-scale solo showcase in Tokyo, will feature both recent works created after a pivotal shift in 2021 and a selection of celebrated pieces from his earlier career. Through diverse media, Okazaki explores the potential of form to offer new perspectives on human understanding. The show promises a journey into his expansive vision, from intricate sculptures to large, thought-provoking canvases.
